CTFO CBD OIL Instructions (300mg, 500mg, 750mg 1500mg)

CTFO CBD Oil Drops are made from Non-GMO, Pesticide Free, CO2 Extracted Hemp Oil using only organic ingredients. And like all our products, they're manufactured in the USA in a registered GMP, cruelty-free facility. All 4 potencies are naturally flavored with peppermint, so they taste great! They are derived from totally natural ingredients, so every batch of our CBD Oil Drops is uniquely different and the color, taste, smell and potency can all have slight variances from batch to batch. These Drops contain substantial levels of CBD and other cannabinoids and terpenes, including CBG, CBN, CBC and others. They also contain less than the federally allowed amount of THC (<0.3%). These are small bottles of liquid high-potency, Pure Hemp Oil, sometimes called tinctures, that you take by dropping 20 drops (½ dropper full) of oil under your tongue once in the morning and once again in the evening and leaving them there for approximately 30 seconds. There are 50 servings of Premium Hemp Oil per bottle. The 4 different potencies are 300mg, 500mg, 750mg and 1500mg. You take the same amount regardless of which one you're using, but some are more potent than others.

CBD has been shown to reduce vomiting & nausea; suppress muscle spasms; and reduce seizures & convulsions. It also has been shown to:

- ✦ promote relaxation and overall health,
- ✦ relieve anxiety,
- ✦ reduce cravings,
- ✦ aid in digestion;
- ✦ Supports optimal immune function and promotes regeneration of healthy cells.

The 300mg and 500mg Drops will typically create more subtle results with most people than the more potent 750mg and 1500mg Drops. Every person's physicality is unique and no one but you can determine which product strength is best for you, depending on what your health needs are. However, we do have some guidelines we like to offer.

- ✦ The 300mg drops are for those looking to maintain optimal health.
- ✦ The 500mg drops are for those looking for a slightly higher-level CBD oil to stimulate optimal health.
- ✦ The 750mg drops are for those looking for an even higher-level of CBD oil to maintain healthy immune function.
- ✦ The 1500mg drops are the highest level of CBD oil to support the body's antiviral and natural healing capabilities.

If this is your first time trying CBD Oil, we recommend the following:

Start with a quarter to a half of the recommended dose to first see how YOUR body reacts. Allow 30 minutes to 1 hour to feel the full effects. You should also repeat this process with each new order you receive; as mentioned before, every batch can vary.

If you have any questions about your product order, please don't hesitate to contact our customer support agents by either calling us at (707) 449-4567 or emailing us at support@myctfo.com
